

ADRIANO YUDI R. NISHIMOTO

Back-end Developer · Fullstack Developer Junior

Campo Grande, MS | rnishimotoyudi123@gmail.com | [LinkedIn: linkedin.com/in/adriano-nishimoto/](https://www.linkedin.com/in/adriano-nishimoto/) | [GitHub: github.com/AdriYNishimoto](https://github.com/AdriYNishimoto)

PROFESSIONAL SUMMARY

Software developer with 3–4 years of technical experience focused on back-end and fullstack development. Specialized in building efficient, scalable systems using C#, .NET, Node.js, and React. Hands-on experience with data analysis and process automation using Python and Power BI, microservices architecture, Clean Architecture, and generative AI integration (Gemini, Claude Code). Strong at rapid learning, structured problem-solving, and delivering consistent, high-quality code.

PROFESSIONAL EXPERIENCE

Technical Analyst — Rintek LTDA Jan 2026 – Jun 2026

Campo Grande, MS

- Process automation and data analysis with Python (pandas, numpy) — data cleaning, structuring, report generation, and system integration.
- Built interactive dashboards and reports in Power BI with data modeling and DAX measures to track management KPIs.
- Developed and maintained advanced Excel spreadsheets (pivot tables, complex formulas, data validation and consolidation) to support decision-making.
- SQL queries for data extraction, filtering, grouping, and cross-referencing in relational databases to support analytical reporting.
- Full-stack development of internal system features, using React, Next.js, Node.js (NestJS), Django, Python, C#, .NET, and PostgreSQL.

Technical Support — SAE+C Apr 2025 – May 2026

Campo Grande, MS

- Specialized technical support for clients, with structured analysis of system issues and identification of effective solutions.
- Customer service focused on clear communication, deep understanding of needs, and proposal of tailored adjustments.
- Platform incident analysis, root-cause diagnosis, and implementation of technical fixes.

Administrative Support Technician — SENAI-MS Apr 2024 – Aug 2024

Campo Grande, MS

- Development and maintenance of analytical spreadsheets in Excel and Power BI dashboards for operational control.
- Preparation of technical reports and management of operational workflows with a focus on efficiency.
- Administrative process support and development of specialized customer service skills.

RELEVANT PROJECTS

Digicoin – Gamified Employee Engagement System · DIGIX | Software Factory

Gamified system developed during technical training in a software factory environment. Deployed internally at DIGIX to encourage employees to deliver results through rewards and gamification dynamics.

Stack: Django (Back-end), Python, JavaScript | Status: Deployed (internal)

GreenConnect – Collaborative Incentive Platform · Schneider Electric

Technical challenge developed for Schneider Electric. Collaborative incentive platform with gamification to motivate employees and reward results. Architecture focused on intuitive user experience and responsive design.

Stack: React, JavaScript, HTML, CSS (Front-end)

SoftCo – AI-Powered Technical Support System · *Soft Tech*

Intelligent technical support platform integrating generative AI for automatic analysis of client requests. System classifies complexity level (Level 1 or 2) and delivers automated AI-based responses, reducing response time.

Stack: React (Front-end), Google Gemini (Generative AI)

Legacy-to-Modern Code Translation System · *Ford*

Strategic project for legacy codebase modernization. Uses AI agents to analyze legacy code and automatically transcribe it into modern, secure languages, reducing migration complexity and accelerating refactoring.

Stack: Python (Back-end), React (Front-end), Google Gemini (AI Agents) | Status: Pilot Project | Team: Collaborative work

TECHNICAL SKILLS

Programming Languages: JavaScript (Intermediate), Python (Intermediate), C# (Basic/Intermediate)

Frameworks & Libraries: React (Intermediate), Next.js (Basic), NestJS (Basic), .NET (Basic/Intermediate), Django (Intermediate)

Databases: SQL Server (Intermediate), MySQL (Intermediate), PostgreSQL (Intermediate) | Relational modeling and query optimization

Software Architecture: Microservices, Clean Architecture, Design Patterns, RESTful APIs

DevOps & Tools: Docker (Basic), Git (Intermediate), GitHub (Intermediate), Docker Compose

Applied AI: Google Gemini integration, Claude Code for development automation and acceleration

Data & Analytics: Python (pandas, numpy), Power BI (DAX, dashboards), Excel advanced, SQL, Power Automate, N8N

EDUCATION

B.S. in Software Engineering — FIAP · *Feb/2023 – Dec/2026 (Final year, in progress)*

Technical Degree in Systems Development — SENAC Hub Academy · *Feb/2024 – Nov/2025 (Completed)*

CERTIFICATIONS

- NLW Connect – C# | Rocketseat | Feb/2025
- Generative AI | Alura | Nov/2024
- Algorithms and Logic | Udemy | Dec/2024
- C#: Building Your First Application | Alura | Jul/2024
- Python Algorithm Programming | Brazilian Space Agency (AEB/MCTI) | Mar/2026
- Introduction to Programming | Alura | Jun/2024

LANGUAGES

- Portuguese: Native
- English: Basic/Intermediate
- Spanish: Intermediate
- Japanese: Basic

KEY STRENGTHS

- **Rapid Learning:** proven ability to pick up new technologies and deliver results within tight timeframes.

- **Structured Problem-Solving:** deep logical analysis, root-cause identification, and implementation of sustainable solutions.
- **Consistency & Quality:** obsessive focus on clean code, best practices, and continuous improvement.
- **Process Automation:** skilled at identifying operational bottlenecks and building automation solutions with Python, Power Automate, and N8N.
- **Solid Technical Foundation:** robust programming logic, design patterns, and SOLID principles.
- **Generative AI Experience:** hands-on integration of Gemini and Claude Code in real projects.
- **Teamwork:** collaboration, clear communication, empathy, and technical leadership.
- **Adaptability:** flexible across different work arrangements (full-time, freelance, remote, hybrid, on-site).
